

## EPS EUROPE IS AWARDED A GOLD SUSTAINABILITY RATING FROM ECOVADIS

**Ambacht, The Netherlands – February 27, 2024.** EPS – Engineered Polymer Solutions, manufacturer of high-performance acrylic polymers, has been awarded a gold medal from EcoVadis for its European division. EcoVadis is a trusted provider of business sustainability ratings and according to its website, “Medals are awarded based on the percentile rank of a company which is calculated at the time of scorecard publication. It compares a company’s performance with all rated companies in our database over the previous 12 months.” EcoVadis rankings encompass all industries.

EcoVadis is the global standard for business sustainability ratings. The EcoVadis assessment evaluates 21 sustainability criteria across four core themes: Environment, Labor & Human Rights, Ethics and Sustainable Procurement. More than 85,000 companies globally have been rated by EcoVadis. A gold medal places EPS in the top 5%.

“Our EcoVadis gold medal represents a milestone in our sustainability journey, showcasing our commitment,” said Massimo Longoni, Senior Sales Manager for EPS, stating that “Rather than an endpoint, it marks our dedication to contributing to the industry’s commitment to sustainability. This achievement inspires us to further enhance our role in fostering a positive impact.”
