

## EPS® 2157D

### All-Acrylic Emulsion

#### MARKET SEGMENT: ADHESIVES

#### COMMON APPLICATIONS: PRESSURE-SENSITIVE ADHESIVES

EPS® 2157D is an all-acrylic polymer emulsion for use in removable pressure-sensitive adhesive applications. EPS® 2157D exhibits moderate peel and tack with high shear values. It also exhibits a “soft” peel compared to other products with equivalent peel and tack with a harder “zip-like” peel.

#### PERFORMANCE BENEFITS

- 180o Peel (PSTC-101) 2.2 lbs./inch
- Loop Tack (PSTC-16) 2.3 lbs./inch
- Static Shear (PSTC-107) > 10,000 minutes (1"x1"x1Kg)
- Low foaming

#### TYPICAL PROPERTIES

<b>Weight Solids</b>	52.5 ± 1.0%
<b>Weight/Gallon</b>	8.54 ± 0.10
<b>pH</b>	6.0 - 8.0
<b>Tg</b>	-40° C

These typical properties do not represent specifications.
