

RayCryl[®] 1856

All-Acrylic Emulsion

MARKET SEGMENT: SPECIALTY

COMMON APPLICATIONS: TEXTILE COATINGS

RayCryl[®] 1856 is a high-solids, all-acrylic polymer that develops a moderately soft and flexible film that can be used for domestic or industrial textile fabric coatings.

PERFORMANCE BENEFITS

- Soft and flexible free film
- Improved foamer
- UV resistance and film clarity
- Self-crosslinking and carboxyl group
- Can be filled with clay, starch or calcium carbonate
- Made without APEO surfactants

TYPICAL PROPERTIES

Weight Solids	55%
Weight/Gallon	8.78
pH	3.0 – 4.5
Volume Solids	52.6%
MFFT	23°C
Volatile(s)	Water

These typical properties do not represent specifications.
