

# RayFlex<sup>®</sup> 759

## Styrenated-Acrylic Emulsion

**MARKET SEGMENT: CONSTRUCTION**

**COMMON APPLICATIONS: TOPCOATS**

RayFlex<sup>®</sup> 759 is a styrene acrylic emulsion designed for a variety of exterior coatings. It is ideal for flexible roof coatings, textured finishes, and wall mastics. Coatings formulated with RayFlex<sup>®</sup> 759 have improved tensile strength, elongation properties, low temperature flexibility, and superior water and dirt pick-up resistance.

### PERFORMANCE BENEFITS

- Elongation and strength
- Water resistance
- Shear and pigment stability
- Made without APEO surfactants

### TYPICAL PROPERTIES

Weight Solids	50.0 +/- 1.0%
Weight/Gallon	8.6
pH	7.0 – 8.0
Volume Solids	48.5 +/- 1.0%
Tg	-26° C

These typical properties do not represent specifications.
